NYLON Filament 1.75mm 3.0mm for 3D printer

Material: NYLON

Brand name: Siridi

Filament diameter: 1.75mm/3.0mm

Weight: About 1KG (about 2.2LBS)

Print temperature: 230-260 centigrade

Packing: 1kg/spool/polybag/box,

N.W.:1kg, G.W.:1.4kg box size: 20*20*12cm 12boxes/carton,

N.W.: 12kgs, G.W.: 17kgs carton size: 38.5*38.5*35cm

3D printer has been used by designers, engineers and scientists to produce the disposable mechanical products and model, and it is already widely used in health care, education, toys, building, automobile, electronics, and anime field.

There are a multitude of different 3D printing technologies out there all using different materials to build objects. We supply Siridi ABS PLA HIPS filament of 3D printing materials for the 3D printers.

Parameter	Unit	PETG
Density	g/cm ³ , 21.5°C	1.14
Melt Point	°C	230-260
Heat-Deflection-Temperature	°C	210
Shrinkage	%	1.5-1.8
Tensile Strength	MPA	83
Bending Strength	map	2800
Diameter	mm	1.75/3±0.05
Color	-	28 colors
